

Xpress Maps

Digitises, simplifies and improves the efficiency of local authority ward and polling district reviews.

Xpress Maps, our paperless mapping tool, enables local authorities to easily review boundaries online, create new scenarios for consultation and balance elector totals of Wards and Polling districts.

Redistricting, the drawing and revising of electoral boundaries, can be a complex process. Ward and polling districts need to be carefully constructed in order to properly represent the electorate. Voting proportions need to be maintained across all districts to ensure that each vote counts equally. Any change has an impact and stakeholders need to be consulted.

Consultations often generate a large paper trail as maps are printed and marked-up, catchment calculations made and repeatedly revised and proposed changes shared back and forth. It can be difficult to resolve opposing views and the process can be slow and inefficient.

Xpress EMS is Trusted by over

70%

of local authorities in
England and Wales

Improving the electoral process with mapping technology

Xpress Maps utilises cloud technology underpinned by a geospatial engine designed specifically for government services. This new cloud software makes local ward and polling district reviews easier and quicker. Enabling Local Authorities to examine and review boundaries quickly online and recalculate elector totals. Edited scenarios can be viewed, amended and approved by stakeholders using an intuitive online dashboard.

Xpress Election Management System (EMS) users can easily import boundary changes back into the system to update Xpress Register, eliminating time-consuming manual processes.

Saves time and money

Simplifies consultation and decision-making

Change boundary lines online and see impact in real-time

Key features

- ▶ Quickly move boundaries on-screen and calculate elector totals
- ▶ Achieve a more evenly distributed electorate within a region
- ▶ Easy to use mapping tool, produces reports at the touch of a button
- ▶ Integration with Xpress Register for easy export and import of data
- ▶ Edited scenarios can be viewed by authorised stakeholders
- ▶ Improving the efficiency of the consultation process.

Why choose Xpress Maps?

Saves time and money with efficient online process

Seamlessly integrates with the Xpress software suite

Shows impact of changes in real time

Reduces paper use and simplifies consultation

Print new boundary scenarios at the touch of a button

Simple to set up and get started

Xpress Maps is part of our market-leading electoral management software, which includes:

- ▶ Xpress – Register & Management
- ▶ Mobile Canvasser App
- ▶ WebReg
