

# Responsive Digital Services

Creating the best digital experience for your customers and communities

Digital services, portals and responsive interfaces that optimise user experience, reduce cost to serve, and meet government digital standards.

**90%** of consumers expect to be able to use an online portal for customer service, with two-thirds using multiple channels to make contact\*. With customers demonstrating an increasing desire to self-serve, organisations need to create intuitive services that users can access via the web and from their mobile devices. To deliver compelling experiences for your customers, you need to understand their needs, keep pace with evolving technology, and deploy new services quickly and efficiently.

Civica's Responsive Digital Services can help you to meet those expectations by designing and building responsive digital services across mobile and web channels, to meet your user's needs. You can count on our expertise whether you're looking to develop a new digital service, or modernise an existing one to extend its life.

### User-centric design services

Our user research (UR) and user experience (UX) teams will work with you to put users at the centre of the design and build process. We conduct workshops and interviews to understand user needs, define user journeys, and prototype

designs. Our consultants use established standards, including responsive design, to develop an excellent, accessible experience for users across channels and devices.

### Customer portals and mobile solutions

Services we design deliver a high-quality user experience across web and mobile, and increase operational efficiency for your organisation. These can include:

- ▶ **Reduced cost to serve** by moving service users from face-to-face and telephone engagements to lower-cost digital interactions
- ▶ **Smaller admin burden** as your teams depend less on manual processes and no longer have to re-key information captured on paper
- ▶ **Smoother business processes** through integration of apps and portals with your back-end systems

### GDS-compliant digital services

We develop Digital Engagement Solutions for government departments and other public sector

**Customer satisfaction**

**Reduce the cost to serve**

**Smoother business operations**

organisations that comply with the Government Digital Service (GDS) Service Standard, and meet National Cyber Security Centre (NCSC) guidelines.

Our agile delivery approach incorporates the GDS Service Standard to achieve compliance. We can deliver outcomes for any combination of Discovery, Alpha, Beta and Live services. Using our public-facing platform for digital services, we fast-track service creation and deployment through the use of accelerators and pre-built publicly available components, such as GOV.UK Notify.

### Our customers

Civica has over **25 years** of experience delivering Responsive Digital Services for government departments, agencies local authorities and clients across financial services and transport sectors.

\*Microsoft, Global State of Multichannel Customer Service

## Why Civica?

- ▶ We're experienced developers of **award-winning** apps and portals for both government and enterprise customers
- ▶ Our specialist teams provide the right scale and combination of expertise to suit any project or budget requirements
- ▶ We are a **certified partner** of both Microsoft Azure and AWS
- ▶ Our certified UR/UX practitioners have the necessary skills to fully understand your user's needs and design optimal experiences
- ▶ Our agile development process and platform are designed to accelerate and de-risk delivery
- ▶ Our teams and processes deliver GDS-compliant services, with security-cleared personnel and government-approved facilities suitable for SECRET projects and above.
- ▶ Our change management consultants support you on every step of your digital transformation initiative

## Our approach

**Design** - We use story boards, wireframes and prototypes to rapidly obtain user feedback, validating understanding, exploring uncertainty and confirming design options before we move to the build phase.

**Build** - We take an Agile approach to build and delivery that uses DevOps principles, CI/CD pipelines and cloud services to deliver value early and then iterating. We ensure a consistent, high-quality user experience across channels and devices through continuous user testing and measuring of user feedback on the responsive experiences we build.

**Improve** - After go live we continue to improve the customer experience through feedback and continuous service improvement. We offer change management consultancy and support to ensure new systems and processes become business as usual.

## Accelerating DVA's online licences

We delivered a new Driver Licensing Online System to the Driver & Vehicle Agency - helping to reduce the manual handling demands on the Driver Licensing teams. [Read the full story here.](#) The system provides online digital applications, automated application receipts, digital payment processing and fast track processing, enabling:

- ▶ Improved driving license renewal experience for thousands of Northern Ireland drivers
- ▶ Reduced driving license renewal processing time by over 45%
- ▶ Improved accuracy and completeness of driver licensing information.

## A national system for Environment Agency

Waste management is becoming an increasingly important business issue. Civica designed a state-of-the-art new online system to handle waste transfer notes helping to reduce the administrative burden of completing 25 million waste transfer-

notes each year, minimise paper storage requirements and improve the quality of waste. [Read the full story here.](#) DVA have now:

- ▶ Saved **£12m annually** for UK businesses
- ▶ Saved **£1m** to the government
- ▶ Migrated **80%** of waste transfer notes to completed online.

## Benefits of Responsive Digital Services

- ▶ Reduce the cost to serve by shifting customer interactions to digital channels
- ▶ Allow your customers to self-serve, anytime, anywhere, from any device
- ▶ Deploy apps and portals that comply with accessibility guidelines and best practice
- ▶ Improve agility by enabling rapid, efficient change as your business and user needs evolve
- ▶ Shorten service fulfilment and delivery times by digitising the user journey
- ▶ Increase revenues by making it easier for customers to transact with your organisation
- ▶ Enhance customer retention, loyalty and advocacy with easy-to-use digital channels
- ▶ Ensure delivery of public sector digital services that comply with the GDS Service Standard.
