CIVICA

Transforming the way you work

Teacher Toolkit reduces administration to keep the focus on teaching & learning

Our teacher tools module is designed to support teachers to work more productively, streamlining administrative tasks and supporting teaching and learning.

Core benefits

A complete set of tools

CE Teacher Toolkit includes a full suite of tools which enable busy teachers to quickly complete their administration tasks, whether they are in the classroom or out in the field.

Mobile first design to reflect the active schedules of teachers

Our solutions are all designed to be used on whichever device is most suited to the task. For Teacher Toolkit, we recognize that teachers may choose to use a smartphone or tablet instead of their laptop - which is why all modules are completely responsive and optimised for smaller screens as well as a traditional laptop or PC. This means that vital pastoral care and family data is available in real time for teachers on whichever device is most convenient.

Saves time with personalised task lists

Teacher Toolkit eliminates the need for teachers to find their way through various systems – all essential information is delivered to them.

"Everything is only one or two clicks away."

Mark the roll in less than a minute

Easy and quick attendance marking on any device.

Intuitive and easy to use interface

A ten minute video introduction is the only induction required for users to confidently navigate the solution. No face-to-face training is required.

Functional features of Teacher Toolkit

Teacher dashboard: up-to-date schedules and task lists

Class profiles: information about your roll groups and timetabled classes

Student profiles: comprehensive student information at your fingertips

Attendance management: take the roll using your phone, or tablet if preferred

Pastoral care management: record incidents and initiate workflows
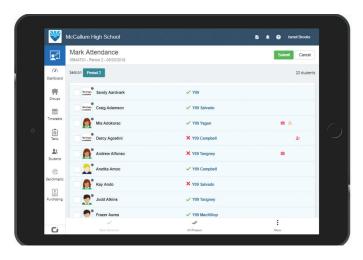

Communication centre: easy communication with students, caregivers and staff

Timetables: quick access to staff and student timetables and calendars

Academic reporting: student assessment and reporting to parents

Seamless integration: with Frog LMS to provide lesson plans, assignments, homework, student progress tracking, etc.
